Versatility
The APEC horizontal ribbon mixer has been installed world-wide in a variety of applications including animal feed, pet food, powdered drink mix, polyester resin, vitamin premixes, and mineral premixes.

Heavy Duty Construction
• The APEC horizontal ribbon mixers use a double ribbon agitator mounted with solid spokes to a solid center shaft. Shaft sizes range from 2-1/4" to 6" in diameter.

• The shaft mount reducer eliminates the chain and sprocket arrangements found on other mixers and simplifies maintenance. Drive sizes range from 3 to 60 hp.

• All mixers are constructed with a 3/16" or 1/4" thick tub and 1/4" or 3/8" end plates

• All mixers use ball bearing flange or spherical roller bearings to support the main shaft

Fast Cycle Times
Our design provides complete and gentle blending of ingredients.

Available in mild or stainless steel construction.
