

SAFE BULK MATERIAL HANDLING

With the integration of APEC's bulk bag discharger (also known as a super sack unloader), it is possible to eliminate many possibly dangerous situations for industry workers, such as disconnections, dead spots, or the need for an operator to manually clear blockages. With our innovative designs, and a wide variety of options, it is possible to advance convenience and cleanliness, as well as safety.

STANDARD FEATURES

- Can handle bulk bags with 300kg's capacity and above
- Adjustable top frame
- Stainless steel cylindrical bag spout enclosure with iris valve provides an enclosed area for untying the bag
- 3" diameter connection point for customer supplied dust collection hook-up

OPTIONAL FEATURES

- Discharge surge hopper
- Pneumatic bag agitators
- Horizontal or inclined discharge feeders
- Electric chain hoist for bag loading/unloading
- Food grade finish
- Stainless steel framework
