

VEHICLE DISINFECTING EQUIPMENT

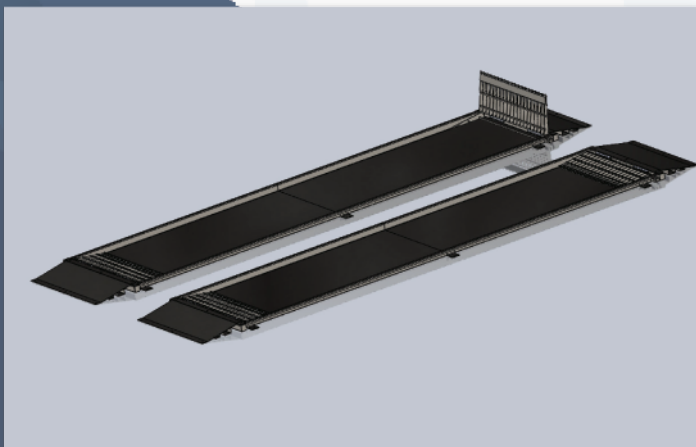

INCREASE SANITATION

With contagions like the avian flu and the swine flu a constant concern for the poultry and livestock industries, APEC offers custom solutions to help prevent the spread of these viruses. Decontaminating vehicle wheels prior to entry into your bio-secure facility can help keep contagions and foreign contaminants at bay.

Drive-through Sanitation Pan With Truck Ramps

FEATURES

Stainless steel truck ramps with drive-through disinfecting pans that contain a sanitizing solution to decontaminate wheel surfaces prior to a vehicle entering a bio-secure facility. The disinfecting pans apply a disinfecting agent, coating the front, sides, rear, and bottom of cars, trucks, semis, and trailers entering the property.

*Example of drive-through sanitation pan design

CUSTOM SANITATION SOLUTIONS

At APEC, we design and build custom equipment for your unique needs. If you are looking for a custom vehicle sanitation solution, our engineers will design a system for you, from basic to fully automated, to meet your needs.
